RURAL BUSINESS-COOPERATIVE SERVICE

Purpose Statement

USDA Rural Development's Business and Cooperative Programs provide loans, loan guarantees and grants designed to increase economic opportunity in rural America.

Authorization and Program Descriptions

Business and Industry Guaranteed Loan Program (B&I) – Authorized by section 310B of the Consolidated Farm and Rural Development Act, 7 U.S.C 1921. Access to capital is key to keeping and increasing the number and size of businesses operating in rural areas. The guaranteed loan program supports financing for business and industrial acquisition, construction, conversion, enlargement, repair or modernization outside a town or city with a population of less than 50,000. Loan funds are used to finance the purchase and development of land, easements, rights-of-way, buildings, equipment, facilities, machinery, supplies and materials. Loan funds also pay startup costs and supply working capital. Sole proprietors, as well as public, private, or cooperative organizations, Indian tribes, and corporations are eligible. The loan guarantee percentage drops from a maximum of 80 percent for loans of up to \$5 million to 60 percent for loans between \$10 million and \$40 million. The aggregate loan amount available to any one borrower under this program is limited to \$25 million. An exception to the limit is for cooperative organizations when the facility is located in a rural area and the facility provides value-added processing of an agricultural commodity. The maximum amount in such cases is \$40 million and must be approved by the Secretary.

Rural Business and Cooperative Grants - This grant program will benefit small and emerging private businesses and cooperatives in rural areas by providing grant and technical assistance for economic and community development. This grant program will assist a wide range of recipients, including economic development organizations, business and community intermediaries, universities, and tribes. To better serve the agency's mission to ensure that rural communities are self-sustaining, repopulating, and thriving economically, this program will use an evidence based model in awarding funding where grantees must meet minimum performance targets that encourage private sector growth. By supporting evidence based practices, the agency anticipates that this program will increase the number of jobs created and saved.

Intermediary Relending Program (IRP) – Authorized by section 1323, Food Security Act of 1985. Revolving loan programs, such as the IRP, address the lack of available credit and financial market conditions, which exist in many rural communities, especially for smaller entities, service businesses and start-up activities. These conditions often limit the ability of rural economies to create jobs, enhance amenities, and increase incomes to enable rural families to prosper.

Rural Economic Development Loans and Grants (REDLG) – Authorized by section 313 RE Act of 1936, as amended, 7 U.S.C. 940C. This program provides zero-interest loans and small grants to electric and telephone utilities financed by the Rural Development's Utilities Programs, which in turn use the funding to promote sustainable rural economic development and job creation projects and to capitalize revolving loan funds for economic development and job creation purposes.

Rural Business Enterprise Grant (RBEG) - Authorized by section 310(B)(c) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932). RBEGs are used to support the development of small and emerging private business enterprises in rural areas. Grants are made to public bodies and private nonprofit corporations serving rural areas. Public bodies include States, counties, cities, townships, and incorporated town and villages, boroughs, authorities, districts, and Indian tribes on Federal and State reservations and other Federally recognized Indian Tribal groups in rural areas.

Rural Business Investment Program (RBIP) – Authorized by section 6029 of the Farm Security and Rural Development Investments Act of 2002, P.L. 107-171. RBIP is designed to promote economic development and create wealth and job opportunities among individuals living in rural areas and help meet the equity capital investment needs primarily of smaller enterprises located in such areas. Under the RBIP, for-profit Rural Business Investment Companies (RBIC) make venture capital investments in rural areas with the objectives of fostering

economic development in such areas and returning maximum profits to the RBIC's investors.

Rural Energy for America Program (REAP) – Authorized by section 9006 of the Farm Security and Rural Development Investments Act of 2002, P.L. 107-171, as amended by the Food, Conservation, and Energy Act of 2008, P.L. 110-246. REAP loan and grant programs help farmers, ranchers and rural small businesses purchase and install renewable energy systems and make energy efficiency improvements. Renewable energy projects benefit agricultural producers and rural small businesses with new and sustainable, income streams; reduced reliance on fossil fuels; and an improved environment. Energy efficiency projects also reduce the cost of production and business operations. Grants may also be used for energy audits and feasibility studies.

Rural Cooperative Development Grants (RCDG) - Authorized by section 310B(e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1932 (e)). RCDGs improve the economic condition of rural areas by promoting a range of cooperative development activities. Grants are made to nonprofit corporations and institutions of higher education to operate centers for cooperative development. The centers address rural economic problems in two ways. First, a center brings together expertise in cooperative development and cooperative business operations that would otherwise be more difficult to obtain. Second, these experts in cooperative development facilitate new cooperative businesses and improve the operations of existing cooperatives through technical assistance and educational programs.

Value-Added Agricultural Market Development Grant Program (VAPG) - Authorized by section 213 of the Agricultural Risk Protection Act of 2000, P.L. 106-224, as amended. Value-added agricultural market development grants enable producers of agricultural commodities to participate in the economic returns found in the value-added market. Grants may be used to develop business plans and develop strategies for creating marketing opportunities. Grants may also be used for feasibility studies and to provide capital to establish alliances or business ventures allowing producers to better compete in domestic and international markets.

Small Minority Producer Grants - Authorized by the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act of 2006, P.L. 109-97 and subsequent appropriations acts. Grants to assist small, minority agricultural producers in rural areas provide funding for cooperative development centers, cooperatives or associations of cooperatives whose primary focus is to provide assistance to such producers, and whose governing board and /or membership is comprised of at least 75 percent socially disadvantaged members. Grants may be used for developing business plans, conducting feasibility studies, or developing marketing plans for farmers, ranchers, loggers, agricultural harvesters, and fishermen.

Cooperative Research Agreements - Authorized by the Cooperative Marketing Act of 1926, (7 U.S.C. 453). Cooperative agreements are used to encourage research on critical issues vital to the development and sustainability of cooperatives as a means of improving the quality of life in America's rural communities. Research proposals are solicited from institutions of higher education or nonprofit organizations interested in applying for competitively awarded cooperative agreements for research related to agricultural and nonagricultural cooperatives serving rural communities.

Cooperative Education and Research Program - Authorized by the Cooperative Marketing Act of 1926, (7 U.S.C. 453). The cooperative program conducts applied research on practical issues and problems facing cooperatives and disseminates information to farmers and the general public on dealing with these issues. A range of educational activities and materials are developed to increase public awareness of cooperative strategies that can increase rural economic activity. Research findings are disseminated through a range of publications, such as the Rural Cooperatives magazine, the Internet, and participation in a variety of research and professional organization events.

Technical Assistance to Cooperatives Program - Authorized by the Cooperative Marketing Act of 1926, (7 U.S.C. 453). The cooperative program is authorized to provide advice and assistance to existing cooperatives and groups of farmers contemplating the formation of cooperatives. Technical assistance is provided through a network of staff at the national and State offices. Technical assistance studies are provided at the request of a cooperative or steering committee at no fee and may cover a range of business operational, organizational, financial, or developmental topics and problems. Resources to support these important activities are provided from the general

salaries and expense account appropriated to Rural Development.

Appropriate Technology Transfer for Rural Areas (ATTRA) Program - Authorized by section 310(c) of the Consolidated Farm and Rural Development Act of 2008. ATTRA provides information to farmers and other rural users on a variety of sustainable agricultural practices that include both crop and livestock operations. The program encourages agricultural producers to adopt sustainable agricultural practices, which allow them to maintain or improve profits, produce high quality food and reduce adverse impacts to the environment.

Delta Health Care Services (DHCS) - Authorized by section 310B (e) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1981 et seq.) (as amended) . DHCS is designed to provide financial assistance to address the continued unmet health needs in the Delta Region through cooperation among health care professionals, institutions of higher education, research institutions, and other individuals and entities in the Delta Region. Grants are made to consortiums, a combination or group of regional institutions of higher education, academic health and research institutes, and economic development entities located in the Delta Region that have experience in addressing the health care issues in the region. Grant funds may be used to finance development of health care services, health education programs, or health care job training programs; development and formation of a cooperative to produce and deliver health care services, education and job training programs; or expansion of public health-related facilities in the Delta Region to address longstanding and unmet health needs of the region.

Rural Microenterprise Assistance Program (RMAP) - Authorized under Section 6022, of the Food, Conservation and Energy Act of 2008, P.L. 110-246. The purpose of the program is to provide direct loans and grants to microentrepreneurs with the skills necessary to establish new rural microenterprises and continuing technical and financial assistance related to the successful operation of rural microenterprises.

Biorefinery Assistance Program – Authorized under Title IX of the Food, Conservation, and Energy Act of 2008, P.L. 110-246. The purpose of the section is to assist in the development of new and emerging technologies for the development of advanced biofuels. The program will increase energy independence, promote resource conservation, diversify markets for agricultural and forestry products, create jobs, and enhance economic development in rural economies.

Repowering Assistance Program - Authorized under Title IX of the Food, Conservation, and Energy Act of 2008, P.L. 110-246, the program directs the Secretary of Agriculture to provide financial incentives to biorefineries in existence on June 18, 2008 to replace the use of fossil fuels used to produce heat or power at their facilities by installing new systems that use renewable biomass, or to produce new energy from renewable biomass.

Bioenergy Program For Advanced Biofuels - Authorized under Title IX of the Food, Conservation, and Energy Act of 2008, P.L. 110-246 the program directs the Secretary of Agriculture to make payments to eligible producers to support and ensure an expanding production of advanced biofuels. Advanced biofuels are defined as “fuel derived from renewable biomass other than corn kernel starch” in the 2008 Farm Bill. To receive a payment, an eligible producer shall enter into a contract with the Secretary of Agriculture for production of advanced biofuels.

Geographic dispersion of offices and employees

Rural Development programs are administered by the three agencies representing Rural Development: Housing and Community Facilities, Utilities, Business and Cooperative Development. Rural Development headquarters is located in Washington, D.C. As of September 30, 2012, there were 4,863 permanent full-time employees, including 1,439 in the headquarters and 3,424 in the field offices.

OIG Reports – Completed

34004-001-KC Assessment administration and servicing of the Rural Cooperative Development Grants (RCDGs) program by the Missouri State Office.

OIG Reports – In progress

34099-002-AT Investigation of effectiveness of servicing of the Business and Industry Loan Program by the Georgia State Office.

#34601-006-AT Review of internal controls for Rural Business Programs Intermediary Relending Program.

34601-015-TE National Report On The Business And Industry Loan Program.

34601-004-AT Rural Development lender servicing of Business and Industry Guaranteed loans in Georgia.

34703-001-KC Assessment of Rural Business Enterprise Grants provided under ARRA to ensure monies were implemented timely and effectively, proper controls were established, program participants met eligibility guidelines, participants properly comply with program requirements, and agencies establish effective compliance operations.

GAO Reports – Completed

GAO-08-1123 “Collaboration between SBA and USDA Could be Improved.” GAO determined that USDA had implemented its recommendations and closed this report on June 21, 2012.

GAO-12-260 “Renewable Energy: Federal Agencies Implement Hundreds of Initiatives.” The report described Federal investments in renewable energy and did not include any recommendations.

GAO-12-938R “The Distribution of Federal Economic Development Grant Funds to Communities with High Rates of Poverty and Unemployment.” This report describes selected federal grant programs that support economic development in high poverty areas. The report did not include any recommendations.

GAO Reports – In Progress

GAO-12-819 “Entrepreneurial Assistance: Opportunities Exist to Improve Programs’ Collaboration, Data-Tracking, and Performance Management.” On September 11, 2012, USDA provided GAO with its statement of action outlining how the Department will address the GAO recommendations.

GAO-13-136 “Wind Energy: Additional Actions Could Help Ensure Effective Use of Federal Financial Support.” USDA did not have any comments on draft report. Final report yet to be issued.

RURAL BUSINESS-COOPERATIVE SERVICE

The estimates include appropriation language for this item as follows:

Rural Business Program Account (including transfers of funds)

For the cost of loan guarantees, for the rural business development programs authorized by section 310B and described in section 310B(g) and 381E(d)(3)(B) of the Consolidated Farm and Rural Development Act, \$51,777,000, to remain available until expended: Provided, That sections 381E-H and 381N of the Consolidated Farm and Rural Development Act are not applicable to funds made available under this heading.

Project Statement Footnotes

- a/ Transfers from the Rural Development Disaster Assistance Fund provided by the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009, P.L. 110-329, signed September 30, 2008, for disasters during calendar year 2008 in the amount of \$150 million.
- b/ The North American Free Trade Agreement Implementation Act, P.L. 103-182, 107 Stat. 2057, authorizes the Rural Business-Cooperative Service to accept offsetting collections from the United States Commodity Adjustment and Investment Program for the purpose of making NADBank guaranteed business and industry loans. In FY 2013, an unobligated carryover balance of \$351,233.36 was available for this purpose. The FY 2013 loan subsidy rate is 16.06 percent.
- c/ Natural disaster unobligated available as of August 10, 2010, rescinded in accordance with section 301 of the Education Jobs and Medicaid Assistance Act, P.L. 111-226, signed on August 10, 2010.
- d/ The amounts are rescinded pursuant to Division B, Title 1, Section 1119 of the Department of Defense and Full-Year Continuing Appropriations Act, 2011, P.L.112-10.

Justification of Decreases

- (1) A decrease of \$35,095,000 in funding for the rural business and industry guaranteed loans program (\$775,825,000 available in 2013).

Base funds for the program will continue to create/save jobs. By the end of 2013, the business and industry guaranteed loan (B&I) program projects to create/save 15,784 jobs and assist 422 businesses with a program level of \$775,825,000. The proposed program level in 2014 for the B&I program will mean that Rural Development will be able to create/save approximately 15,070 jobs and assist 403 businesses. Additionally, in 2014, the B&I program will have an anticipated carryover level of approximately \$134 million, which will create/save an additional 2,724 jobs and assist 73 businesses. The 2014 funding plus carryover will bring the total available funding for B&I program to \$874,619,000.

The guaranteed B&I loan level promotes the creation of rural businesses to secure start-up capital, finance expansion, and create jobs, which help diversify the rural economy. This investment provides increased employment opportunities for rural communities and upgrades community infrastructure to improve the quality of life for rural residents.

Continuation of this program is critical because:

- It is the primary program furthering the Department's goal to provide capital to enable rural businesses to participate in the global economy;
- It provides loan guarantees to private sector financial institutions to improve, develop, or finance business, industry, and employment; and to improve the economic and environmental climate in rural communities.

The agency strives to improve the quality of life in rural America by encouraging the establishment and growth of rural businesses and cooperatives, which ultimately increases the availability, stability, and quality of jobs in rural America. The agency also strives to expand economic and trade opportunities for agricultural producers and other rural residents and build leveraging partnerships with State, local and private sources to expand the total amount of resources provided to rural areas.

The B&I program is evaluated on an ongoing basis throughout the year based on a sampling of States and projects to determine if States are effectively administering the program and managing risk. The agency conducts regular evaluations of programs on both national and State levels. These reviews are risk based and assess program regulatory compliance in addition to effectiveness and efficiency. These reviews rely on data maintained in the Guaranteed Loan System (GLS) database as well as project files.

The Business and Cooperative Program Assessment Review (BCPAR), is a RBS process that examines how individual States administer all of Business and Cooperative Programs. The BCPAR process includes a focus on assessing the credit quality and risk management in each State of their B&I portfolio. Subsequently, recommendations are made to ensure the B&I program is being administered effectively and risk is being appropriately identified and managed thereby reducing risk of loss to the Federal government.

At both the National and State levels, risk in the B&I portfolio is also monitored using GLS to assess problem or delinquent loans. By effectively managing this program, RBS is able to leverage Federal investments in rural economic development, thereby creating jobs in rural areas with little cost to the Federal government.

- (2) A decrease of \$24,467,000 in funding for the rural business enterprise grants program (\$24,467,000 available in 2013).

By the end of 2013, the rural business enterprise grants (RBEG) program projects to create/save 9,520 jobs and assist 6,712 businesses with a program level of \$20,935,000. The 2014 budget does not propose funding for this program, but rather proposes the newly created rural business-cooperative grant program that will continue to serve the same constituents and provide similar services to the RBEG program. By creating the new grant program, the agency intends to streamline its grant processes and programs and make them evidence based, which should improve efficiency and effective of agency grant making. In 2014, the RBEG program will have

an anticipated carryover level of \$2.6 million, which will assist in creating/saving 1,026 jobs and assisting 723 businesses.

(3) A decrease of \$2,264,000 for rural business opportunity grants program (\$2,264,000 available in 2013).

The rural business opportunity grant (RBOG) program provides training and technical assistance for business development, entrepreneurs, and economic development officials and assists with economic development planning. In 2013, the RBOG program anticipates creating/saving 289 jobs with a program level of \$1,268,000. In 2014, the RBOG program will have an anticipated carryover level of \$108,000, which will create/save 25 jobs and assist 2 businesses.

The 2014 budget does not propose funding for this program, but rather proposes the newly created rural business-cooperative grant program that will continue to serve the same constituents and provide similar services to the RBOG program.

(4) A decrease of \$2,918,000 for delta regional authority grants (\$2,918,000 available in 2013).

In accordance with Title 7, Chapter 50, Subchapter VI, Delta Regional Authority, Section 2009aa—13, Termination of Authority, the authority provided under this subchapter expired on October 1, 2012, therefore funding is not requested for 2013.

The estimates include appropriation language for this item as follows:

Rural Development Loan Fund Program Account (including transfer of funds)

For the principal amount of direct loans, as authorized by the Rural Development Loan Fund (42 U.S.C. 9812(a)), \$18,889,000.

For the cost of direct loans, \$4,082,000, as authorized by the Rural Development Loan Fund (42 U.S.C. 9812(a)), of which \$531,000 shall be available through June 30, 2014, for Federally Recognized Native American Tribes; and of which \$1,021,000 shall be available through June 30, 2014, for Mississippi Delta Region counties (as determined in accordance with Public Law 100-460): Provided, That such costs, including the cost of modifying such loans, shall be as defined in section 502 of the Congressional Budget Act of 1974.

In addition, for administrative expenses to carry out the direct loan programs, \$4,467,000 shall be paid to the appropriation for the "Rural Development, Salaries and Expenses".

Justification of Funding

- (1) An increase of \$48,000 in funding for the Intermediary Relending Program Direct Loans (\$18,841,000 available in 2013).

Base funds for the program will continue to create/save jobs. By the end of 2013, the Intermediary Relending Program (IRP) projects to create/save 14,244 jobs and assist 641 businesses with a program level of \$18,841,000. The \$18,889,000 program level in 2014 for IRP will mean that Rural Development will be able to create/save approximately 14,280 jobs and assist 642 businesses.

The purpose of the IRP is to alleviate poverty and increase economic activity and employment in rural communities, especially disadvantaged and remote communities, through financing targeted primarily towards smaller and emerging businesses, in partnership with other public and private resources. Eligibility for the program is limited to businesses and community projects that are unable to finance the proposed project from their own resources or through commercial credit or other Federal, State, or local programs at reasonable rates and terms. Many projects are able to access commercial credit and other capital resources for a major portion of their capital needs but not the full amount. The IRP funding is used to fill this “gap” in financial resources. On average, IRP projects are able to obtain \$5 of commercial credit or other capital for every \$1 of IRP funding, leveraging the IRP funds at a rate of 5:1.

Continuation of this program is critical because the program:

- Is the only federal nation-wide program that finances the capitalization of revolving loan fund programs that exclusively serve rural areas;
- The program supports a variety of purposes and activities serving business and community development projects in rural areas;
- The program assists rural small and emerging businesses, which are unable to obtain adequate capital from commercial credit or other Federal, State, or local programs at reasonable rates and terms.

The program supports USDA Strategic Plan Goal 1: Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving. Specifically, Goal 1.1.1, Number of jobs created or saved through USDA financing of businesses. The program addresses the lack of available credit and financial market conditions for smaller business entities, service businesses and start-up business activities. These conditions often limit the ability of rural economies to create jobs, enhance amenities, and increase incomes to enable rural families to prosper.

Program provides loan funds to intermediaries to capitalize revolving loan fund programs. The revolving loan fund programs make loans to recipients in rural communities involving purchase and improvement of land and real estate, equipment purchases and working capital for start-up or expansion of businesses, and other community development projects. The duration of the loan is 30 years.

- (2) A decrease of \$1,955,000 in loan subsidy budget authority (\$6,037,000 available in 2013).

The net decrease in subsidy budget authority is primarily related to the decrease of subsidy rate and this decrease is due the undiscounted prepayments. Undiscounted prepayments is the model assumption for the amount of prepayments RD expects for the cohort. The undiscounted prepayment curve increased, therefore RD projects more prepayments for the program than in 2013. Higher prepayments result in lower subsidy for this program because RD is lending at a lower rate (1 percent) than RD’s cost of capital (2.75 percent for 2014). When loans prepay RD is able to pay back Treasury sooner, and therefore RD pays Treasury less interest.

Justification of Decreases

- (1) A decrease of \$1,303,000 for the rural economic development loan subsidy (\$4,098,000 available in 2013).

There is no request for budget authority because this program is funded from the cushion of credit account. Base funds for the program will continue to create/save jobs. The requested subsidy supports the estimated loan obligation with the requested 2014 loan level for this program. The change is due to a decrease in the subsidy rate in 2014 due to the annual technical assumptions.

Base funds for the program will continue to create/save jobs. In 2013, with a program level of \$33,077,000 the Rural Economic Development (RED) Loan program anticipates creating/saving 2,096 jobs. In 2014, with funding totaling \$72,842,000 (\$33,077,000 in appropriations plus \$39,765,000 estimated in carryover), the RED loan program anticipates creating/saving 4,615 jobs (2,100 with appropriation funding and 2,515 with carryover funding). The agency has been receiving more applications for this program and has increased the loan amount so that larger projects can be funded.

This program provides zero interest loans and small grants to electric and telephone utilities finances by the Rural Development's Utilities programs, which in turn, use the funding to promote sustainable rural economic development and job creation projects and to capitalize revolving loan funds for economic development and job creation purposes. An estimated 2,096 jobs will be created or saved in 2013.

a/ Amounts represent earnings generated by the interest differential on voluntary cushion of credit payments made by Rural Utilities Service borrowers.

Justification of Funding

(1) No change in funding for the rural economic development grant (\$10,000,000 available in 2013).

Base funds for the program will continue to create/save jobs. There are no funding changes proposed for 2014 or any changes in program emphasis or direction proposed for 2014. With no change in funding for the Rural Economic Development (RED) grant program funding from 2013 to 2014, the program anticipates creating/saving 2,259 jobs each year.

The RED grant program provides financing to eligible Rural Utilities Service (RUS) electric or telecommunications borrowers (Intermediaries) to promote rural economic development and job creation projects. Under the RED grant program, USDA provides zero interest loans to local utilities, which they pass through to local businesses (ultimate recipients) for projects that will create and retain employment in rural areas. The ultimate recipients repay the lending utility directly. The utility is responsible for repayment to the agency.

Grants are made to intermediaries to establish revolving loan funds. Zero-interest loans are made by the intermediary from the revolving loan fund to ultimate recipients for the purpose of financing specific, approved projects. Ultimate recipients are responsible for repayment to the intermediary. The ultimate recipient's loan repayments are to be retained in the revolving loan fund, which is maintained by the intermediary, to finance other rural economic development projects.

Continuation of this program is critical because the program:

- It supports a variety of purposes and activities serving local and regional-based projects in rural areas;
- It assists rural businesses and community development projects by providing access to additional capital resources.

The program supports USDA Strategic Plan Goal 1: Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving. Specifically, Goal 1.1.1, Number of jobs created or saved through USDA financing of businesses.

Justification of Increase

(1) An increase of \$22,444,000 in funding for the Rural Microenterprise Assistance Program (\$0 available in 2013).

Base funds for the program will create/save jobs. In 2013 there was no funding for the Rural Microenterprise Assistance Program (RMAP). In 2014, a program level of \$22,444,000 would create/save 1,060 jobs year.

The purpose of the program is to support the development and ongoing success of rural microentrepreneurs and microenterprises. To accomplish this purpose, the program will make direct loans, and provide grants to selected Microenterprise Development Organizations (MDOs). Selected MDOs will use the funds to provide microloans and provide business based training and technical assistance to rural microentrepreneurs and microenterprises.

Continuation of this program is critical because the program:

- Is the only federal nation-wide program that finances the capitalization of microloan revolving loan funds that exclusively serve rural areas;
- Supports a variety of purposes and activities serving rural microenterprises;
- Assists rural microentrepreneurs and microenterprises, which are unable to obtain adequate capital from commercial credit or other Federal, State, or local programs at reasonable rates and terms.

The program supports USDA Strategic Plan Goal 1: Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving. Specifically, Goal 1.1.1, Number of jobs created or saved through USDA financing of businesses.

RMAP addresses the lack of available credit and financial market conditions for microenterprise activities. These conditions often limit the ability of rural economies to create jobs, enhance amenities, and increase incomes to enable rural families to prosper.

Program provides loan funds to intermediaries to capitalize revolving microloan fund programs. The revolving microloan fund programs make loans of not more than \$50,000 to recipients in rural communities involving equipment purchases and working capital for start-up or expansion of microenterprises. The duration of the loan is 20 years. The agency's work completed during the fiscal year will include development of notifications of funding, technical assistance to potential applicants, receipt and processing of applications, award and disbursement of funds, oversight and monitoring of projects, and monitoring of project carried over from the previous year.

(2) An increase of \$1,405,000 in subsidy budget authority (\$0 available in 2013).

The increase in loan subsidy for FY 2014 is to support the discretionary loan level requested.

Justification of Increases and Decrease

- (1) An increase of \$37,863,000 for guaranteed loan Rural Energy For America Program level (\$7,124,000 available in 2013).

Base funds for the program will continue to generate kilowatt-hours of alternative energy. In 2014, the increase of \$37,863,000 will result in a total program level of \$44,987,000 for guaranteed loans. This funding level will result in an increase of 1,845 million kilowatt hours of renewable energy generation/saving and 1.9 million metric tons of CO₂ in reduced greenhouse gas emissions. In 2013, funding for this program of \$7,124,000 is projected to result in 347 million kilowatt hours of renewable energy generation/saving and reduce green house gas emissions by an estimated 348,000 metric tons of CO₂. Increasing energy savings measures and renewable energy generation will: reduce dependence on fossil fuels; diversify power generation and fuel production; and create jobs and economic growth in rural communities.

The guaranteed Rural Energy for America (REAP) loan program provides loan guarantees to farmers, ranchers, and rural small businesses to assist with purchasing renewable energy systems and making energy efficiency improvements to their physical plants.

Continuation of this program is critical because the program:

- Supports Presidential initiatives for a secure energy future;
- Enhances rural prosperity by facilitating sustainable renewable energy development.

The guaranteed loan program provides significant leverage of Federal funds and greatly enhances access to a growing number of agricultural producers and small rural businesses that can greatly benefit from this program.

- (2) An increase of \$5,691,000 for Rural Energy For America Program grants (\$1,710,000 available in 2013).

Base funds for the Rural Energy for America Program (REAP) will continue to generate kilowatt-hours of alternative energy. In 2014, the increase of \$5,691,000 will result in a total program level of \$7.4 million for REAP grants. This funding level will result in an increase of 97.3 million kilowatt hours of renewable energy generation/saving and 9.5 million metric tons of CO₂ in reduced greenhouse gas emissions. In 2013, funding for this program of \$1,710,000 is projected to result in 41.8 million kilowatt hours of renewable energy generation/saving and reduce green house gas emissions by an estimated 4 million metric tons of CO₂. Since the program's inception in 2003, the agency has obligated over \$355 million in grants to more than 8,637 projects.

REAP provides grants to farmers, ranchers, and rural small businesses to assist with purchasing renewable energy systems and making energy efficiency improvements to their physical plants. For the last three years, the program has been oversubscribed approximately by 3 to 1, indicating that agricultural producers and rural small businesses are looking to reduce dependence on fossil fuels and diversify power generation and fuel production. Renewable energy projects funded by USDA grants improve the local economy by creating new jobs at energy plants, enhancing the tax base, and increase local business profits. Recent funds allowed many agricultural producers and rural small business owners to decrease their energy consumption and increase their profit margins.

Applications for REAP grants are scored based on a variety of criteria, including payback, warranty, and technical reviews. Thereafter, the grants are competed.

- (3) An increase of \$10,630,000 in subsidy budget authority for guaranteed loan Rural Energy For America (\$1,710,000 available in 2013).

The increase in subsidy budget authority is primarily related to the increase in the subsidy rate. The subsidy amount is necessary to support the estimated loan obligations associated with the requested FY 2014 loan levels.

Project Statement Footnotes

- a/ Mandatory funding provided by sections 6202 of the Food, Conservation, and Energy Act of 2008, Public Law 110-246, dated June 18, 2008. The Act provides \$15,000,000 from the funds of the Commodity Credit Corporation (CCC) for fiscal year 2009, to remain available until expended.

- b/ The amounts are rescinded pursuant to Division B, Title I, Section 1119 of the Department of Defense and Full-Year Continuing Appropriations Act, 2011, P.L. 112-10.

Justifications of Increases and Decreases

- (1) A decrease of \$5,835,000 in funding for rural cooperative development grants (\$5,835,000 available in 2013).

In 2013, with program funding of \$5,835,000 the rural cooperative development grant (RCDG) program anticipates assisting approximately 313 cooperatives or mutually owned businesses. The 2014 budget does not propose funding for this program, but rather proposes the newly created rural business-cooperative grant program that will continue to serve the same constituents and provide similar services to the RCDG program. By creating the new grant program, the agency intends to streamline its grant processes and programs and make them evidence based, which should improve efficiency and effective of agency grant making.

Cooperatives offer an alternative to investor-owned companies through which those using the entity's goods or services are actively involved in the governance of the organization. Over the last decade, Rural Development has used the RCDG program to develop a network of cooperative development centers, whose trained staff works with of new and emerging cooperatives covering a broad range, including traditional farm supply, marketing, dependent care, conversions of traditional companies to employee ownership.

- (2) A decrease of \$14,000 in funding for appropriate technology transfer for rural areas agreements (\$2,264,000 available in 2013).

Base funds for the appropriate technology transfer for rural areas (ATTRA) will continue to assist businesses. This project provides information to farmers and other rural users on a variety of sustainable agricultural practices that include both cropping and livestock operations.

Continuation of this program is critical because the project:

- Has nationwide reach and provides, on average, assistance to over 2,200,000 agricultural producers and businesses;
- Supports six regional offices to provide information and technical assistance one a wide array of agricultural topics;
- Is the only national program that provides clients one-on-one technical assistance on sustainable agriculture and marketing.

A recent review of the program outcomes and impacts found the following:

- During 2011, ATTRA provided more than 40,000 responses to technical assistance requests.
- The ATTRA website received more than 1.3 million unique visitors and more than 3.3 million publications were downloaded or printed from the website;
- Workshops and presentations by ATTRA staff reached 2,000 attendees and its e-newsletter reached 13,000 subscribers each week.

- (3) A decrease of \$3,018,000 in funding for grants to assist small, socially-disadvantaged producers (\$3,018,000 available in 2013).

In 2013, with program funding of \$3,018,000 this program anticipates assisting approximately 19 cooperatives or mutually owned businesses. The 2014 budget does not propose funding for this program, but rather proposes the newly created rural business-cooperative grant program that will continue to serve the same constituents and provide similar services. By creating the new grant program, the agency intends to streamline its grant processes and programs and make them evidence based, which should improve efficiency and effective of agency grant making.

The small, socially disadvantaged producer grants program provides technical assistance to small, socially disadvantaged agricultural producers through eligible cooperative development centers, cooperatives and associations of cooperatives. Technical assistance provided to socially disadvantaged producers includes activities such as market research; product and/or service improvement; legal advice and assistance; feasibility studies, business plans, marketing plan development; and training.

- (4) An increase of \$914,000 in funding for the value added producer grants (VAPG) (\$14,086,000 available in 2013).

Base funds for the program will continue to assist new or expanding value-added businesses. In 2013, with program funding of \$14,086,000 this program anticipates assisting approximately 109 businesses. In 2014, with funding of \$15,000,000 the program anticipates assisting approximately 116 businesses.

Rural Development will continue to efficiently address demand and assist as many producers with planning funding or working capital funding to establish or run value-added agricultural marketing ventures. The VAPG program helps rural Americans by helping farmers, groups of farmers, and farmer-owned cooperatives add value to their products, allowing producers to build economic gains that then circulate through the local economy. This program provides priority to applicants proposing to increase the development of local and regional food systems.

The VAPG funding will also support the Agricultural Marketing Resource Center, which is an electronic, national resource for producers interested in value-added agriculture. The Center provides resources such as web site information regarding commodities and products, markets and industries and renewable energy, value-added business and economic analysis tools, and outreach activities including workshops, seminars, and newsletters and responding to webmail inquiries.

Continuation of this program is critical because the program:

- Is unique in that it makes planning and working capital funds available to rural entrepreneurs;
- Supports Rural Development and USDA efforts to create and expand economic opportunities throughout rural America.

Justification of Increase

- (2) An increase of \$55,000,00 in funding for the rural business and cooperative grant program (\$0 available in 2013).

The newly created rural business and cooperative grant program will benefit small and emerging private businesses and cooperatives in rural areas by providing grant and technical assistance for economic and community development. This grant program will assist a wide range of recipients, including economic development organizations, business and community intermediaries, cooperatives, associations of cooperatives, universities, and tribes. To better serve the agency's mission to ensure that rural communities are self-sustaining, repopulating, and thriving economically, this program will use an evidence based model in awarding funding where grantees must meet minimum performance targets that encourage private sector growth. By supporting evidence-based practices, the agency anticipates that this program will increase the number of jobs created and saved. By creating the new grant program, the agency intends to streamline its grant processes and programs and make them evidence based, which will improve the efficiency and effectiveness of agency grant process. The 2014 budget proposes the program level of \$55 million, which is anticipated to assist in creating/saving 13,903 jobs and assisting 10,054 businesses and economic development entities.

This program may assist with business development by funding a broad array of activities. The program promotes the creation of small and emerging rural businesses by assisting them with technical assistance, securing capital, financing start-up or expansion, and creating jobs, which helps diversify the rural economy. Priority is given to projects serving low-income small rural communities with high unemployment rates.

The establishment of this program is critical because:

- It supports a variety of purposes and activities serving local and regional-based projects in rural areas;
- It assists rural small and emerging businesses, which lack access to adequate financial and technical resources.

The program supports USDA Strategic Plan Goal 1: Assist rural communities to create prosperity so they are self-sustaining, repopulating, and economically thriving. Specifically, Goal 1.1.1, Number of jobs created or saved through USDA financing of businesses. The program provides funding to community projects, which provide investments and increased employment opportunities for rural communities and upgrades community infrastructure to improve the quality of life for rural residents.

Program provides grant funds involving purchase and improvement of land and real estate, equipment purchases and personnel costs to carry out the project's scope of work. The duration of individual projects is generally one to three years. The agency's work completed during the fiscal year will include development of notifications of funding, technical assistance to potential applicants, receipt and processing of applications, award and disbursement of funds, oversight and monitoring of projects, and monitoring of projects carried over from previous years.

Applications to this program are scored on various criterion including demonstrated experience and/or capacity to meet the intended outcomes. Given the goals of this program, RBS balances the need for demonstrated experience and capacity with the need to support new organizations that may meet the needs of an underserved area.

This account is also available to support the Promise Zones initiative.

RURAL BUSINESS-COOPERATIVE SERVICE

STATUS OF PROGRAMS

Current Activities: The Rural Business-Cooperative Service Programs provide direct loans, loan guarantees, grants, technical assistance and payments designed to increase economic opportunity in rural America. Rural Development (RD) state and field office staffs work collaboratively with political and business leaders to leverage RD resources. The Business and Industry (B&I) Guaranteed Loan Program is one of the major tools that RD employs to facilitate business growth in rural areas.

Specific areas currently being addressed include:

1. Facilitating projects that proactively replace traditional energy imports with domestic production.
2. Improving efficiency (with staff reductions) to maintain program outreach and service to rural communities/clients.
3. Transitioning program delivery to a risk-based management system.

Selected Examples of Recent Progress: Recent accomplishments under this appropriation item are cited below by project:

Business and Industry Guaranteed Loan Program:

The Business and Industry (B&I) Guaranteed Loan Program is RD's flagship job creation and capital expansion business program. In 2012, RD issued 401 B&I loan guarantees totaling \$1.053 billion, assisting 479 rural businesses, and creating and saving 21,750 jobs.

Monadnock Economic Development Corporation is constructing a 13,000 square foot sole tenant facility for the start-up Monadnock Community Cooperative Market. The market will be a full service co-op food market featuring locally grown, all natural meat, cheeses, dairy, vegetables and fruit. The market project capitalizes on the feasibility study funded by Rural Business Enterprise Grant funds for the Great Falls Food Hub. The Food Hub covers Cheshire County, NH, and the new co-op market is squarely identified as a major market in the hub. Loan funds were used for real estate improvements, machinery and equipment.

RD provided an \$8,370,610 B&I Loan Guarantee and \$1,304,390 Rural Energy for America Program loan guarantee to Segal Biofuels, LLC to purchase land, facilities, and equipment, as well as provide working capital and pay loan fees. SEGA Biofuels, LLC was formerly Biomass Innovations, LLC, a briquetting manufacturing plant, which began operations in 2009 and stopped operations in June 2011. Now, SEGA is converting the plant to produce wood pellets for export to the European Union and to later expand the capacity. High prices and uncertain supply for conventional petroleum and natural gas resources have made wood pellets the fuel of choice in most European countries. Wood pellets are being used as fuel for both electrical generation and heating. The European market cannot produce enough pellet products to meet their renewable energy goals. This created a winning business opportunity for SEGA Biofuels LLC.

Since most of the existing equipment is the same as required for a pellet plant, the plant conversion can be accomplished simply by replacing the briquetting machines with pelletizers, and making other related production changes. SEGA marketing has already secured a contract to supply wood pellets to an active commodity brokerage in Copenhagen, Denmark, and discussions with other entities for marketing agreements are also in progress. The majority of the fiber used for pellet production will be purchased from 16 sawmills and in-woods chipping operations within 80 miles of the facility. SEGA will retain the existing plant management team and most of the production staff to assure continuity of operations, 35 jobs in all are created by this new biofuels business.

Rural Energy for America Program:

In 2012, the Rural Energy for America Program (REAP) funded 872 projects totaling \$21,634,127 in grants and \$14,278,112 in loans (\$3,739,438 budget authority). The Renewable Energy System and Energy Efficiency Improvement Program of REAP funded 844 projects with \$6.35 million in discretionary funding (\$1.02 million in grants \$5.33 million in loans) and \$29.56 million in mandatory funds (\$20.6 million grants, \$8.95 million in loans). REAP awarded 854 grants totaling \$21.6 million plus 8 combination loans and grants amounting to \$3.7 million (mandatory and discretionary funds) and 10 guaranteed loans for \$11.6 million for renewable energy and energy efficiency projects. The Energy Audit and Renewable Energy Development Assistance Program awarded 10 grants totaling \$880,000; and the feasibility study awarded 18 grants totaling \$388,979. With this funding, the agency estimates to generate/save approximately 814 million kilowatt hours (kWh).

Edaleen Cow Power, LLC, near Lynden, WA, is one of three anaerobic digester projects that received assistance from REAP in 2012. Edaleen was awarded a grant of \$18,986, and loan guarantee of \$2,138,000, to help install a digester that will generate electricity from manure supplied by local dairy farmers. The farmers deliver manure to Edaleen's collection facility and the manure undergoes conversion into biogas through an anaerobic digestion process. The biogas will create about 9.3 million kWh of electricity. Edaleen has a prearranged power agreement to sell the electricity to a cooperating utility, Puget Sound Energy. The dairy farmers receive high quality bedding material and nutrient management services in exchange for their cow manure.

Helmuth Enterprises, near Hershey, NE, was awarded a 2012 REAP combination \$20,000 grant and a \$99,705 loan guarantee to replace 92 cubic feet of cooler space and help lower the energy costs of running their rural business. The projected energy savings of 219,252 kilowatt hours for the new cooler space is about 40 percent of Hellmuth's total energy use.

Intermediary Relending Program:

In 2012, 61 loans resulted in \$17.6 million available to intermediaries to assist 597 businesses to create or save an estimated 13,452 jobs.

RD awarded a \$500,000 loan through the Intermediary Relending Program to the Alabama Department of Agriculture and Industries (ADAI) to establish a revolving loan fund providing low-interest loans to ultimate recipients— businesses and communities—for energy efficient and energy saving projects.

The first low-interest loan from ADAI's revolving loan fund assisted with equipment purchases for a new, small rural Alabama business. New energy efficient fuel pumps and equipment were installed during the construction of this convenience store. A local lender provided additional funds for this new business construction. This new business will create at least seven new jobs.

Rural Microentrepreneur Assistance Program:

A total of \$903,371 of annual technical assistance grants were obligated for this program in 2012 to Microenterprise Development Organizations (MDOs) to support the development and ongoing success of rural microentrepreneurs and microenterprises. Twenty-one technical assistance grants were awarded resulting in an estimated 80 businesses being assisted and 228 jobs created and/or saved. The following examples demonstrate the use of Rural Microentrepreneur Assistance program (RMAP) funds provided to MDOs to fund projects in rural areas:

Two organizations in Iowa received funding through RMAP. North Iowa Area Community College was awarded a \$130,000 grant and the Iowa Foundation for Microenterprise and Community Vitality, doing business as Iowa MicroLoan, received a \$400,000 loan and a \$100,000 grant. These MicroLoan organizations provide much needed financial assistance to these small businesses.

Rural Economic Development Loan and Grant Program:

In 2012, 65 Rural Economic Development Loans totaling \$40.8 million and 36 Rural Economic Development Grants totaling \$9.6 million were made to qualifying utilities assisting 225 businesses and creating or saving 4,748 jobs.

Central Iowa Power Cooperative, IA, received a \$1,000,000 loan. This project will be for a business expansion of Precision, Inc., in Lenox, IA. Jobs are estimated to increase by 15 employees with the expansion.

Rural Economic Development Grant funds were used by Ralls County Electric Cooperative to establish a revolving loan fund. The initial loan by the revolving loan fund will assist Moberly Area Community College with the construction of a new campus in Hannibal, MO. The new campus will allow Moberly Area Community College to provide educational and vocational training courses to area residents. The project will create 5 new jobs and save 20 existing jobs.

Rural Business Opportunity Grant Program:

In 2012, the 42 grants awarded to residents and businesses in 26 states totaled \$2.3 million and created or saved more than 496 jobs.

Montana's Crow Tribe of Indians was selected for a \$50,000 grant to prepare an economic development plan for the reservation. The plan will focus on developing energy and mining resources.

The Northwest Agriculture Business Center in Mount Vernon, WA, will use a \$50,000 grant to provide technical support for existing agricultural processors and incubate new processors of agricultural products in Northwest Washington. Long-term business strategic planning will be utilized to improve economic conditions in rural areas.

Rural Business Enterprise Grant Program:

In 2012, 426 Rural Business Enterprise Grants (RBEG) were awarded, totaling \$25.5 million. These grants assisted 7,236 businesses in creating and saving 11,749 jobs.

The City of Luverne, MN, used a \$99,990 RBEG along with \$50,000 contribution to create a revolving loan fund to assist small and emerging businesses within the City of Luverne within the county of Rock, MN. The funds will be available to all sectors including commercial, industrial, and retail for qualified small and emerging businesses. The project is projected to assist 13 businesses create 43 jobs and retain 76.

Value Added-Producer Grant Program:

In 2012, the Value-Added Producer Grant Program awarded \$40.4 million. These grants assisted 299 producers in 44 states and Puerto Rico.

Living Water Farms, Inc., a family company that focuses on the production of hydroponic greens for specialty markets in the Midwest, received a \$300,000 working capital grant to evaluate their brand and expand distribution to restaurants, specialty retail, and institutional outlets. Located in Strawn, IL, the hydroponic complex was developed to supply fresh produce year-round. The current market includes Illinois supermarkets, restaurants in Chicago and St. Louis, and a Midwest college food service program.

Agriberry LLC, located near Mechanicsville, VA, received a \$300,000 working capital grant to expand the marketing of an assortment of fresh, local, seasonal berries and other fruits. Grant funds will assist Agriberry in an expansion to over 35 acres of red raspberries, and other fruits. Agriberry has established a consumer supported summer berry farm and become an agricultural training facility for first-time workers.

Green Mountain Organic Creamery, LLC in North Ferrisburgh, VT, received a \$300,000 working capital grant to market certified organic, pasteurized milk, butter, ice cream, and other dairy products. The dairy was founded to

provide local, organic dairy products to the community and throughout the northeast. Green Mountain was recognized as the Vermont Dairy of the Year in 2011.

Agricultural Marketing Resource Center:

The Agricultural Marketing Resource Center (AgMRC) award provided funding for the maintenance of a virtual resource for national information for value-added agriculture. In addition to supporting the Value Added Producer Grant Program, AgMRC provides a wealth of information on commodities and products including: agriculture-tourism, aquaculture, energy, forestry, fiber, grains and seeds. Additionally, AgMRC provides prospective value added producers with resources and information on markets and industries as well as tools to assist with developing feasibility studies and business plans. Through its Web site, AgMRC offers tips and information for agricultural producers looking to start a business, how to get prepared, and strategies and analysis for developing a successful business. The funds awarded provide the resources, research and other support to maintain the AgMRC Web site. In 2012 \$700,000 was obligated.

Rural Cooperative Development Grants Program:

In 2012, grants totaling approximately \$5.8 million were made to 35 centers. These centers work with and supported new cooperative businesses. In 2012 these centers assisted more than 290 businesses. Among the successful applicants were:

The Rocky Mountain Farmers Union Education and Charitable Foundation, Inc. received a \$175,000 grant to support a business development center for newly formed cooperatives in Colorado.

In Dennison, MN, the Food Co-op Initiative has been selected for a grant, also \$175,000, to support a center that will help create businesses and establish new markets for local producers.

Appropriate Technology Transfer to Rural America:

The Appropriate Technology Transfer to Rural America (ATTRA), also called the National Sustainable Agriculture Information Service, provides sustainable agriculture information to those engaged in or serving commercial agriculture, such as farmers, ranchers, extension agents, farm organizations, and farm-based businesses. In 2012, \$2.25 million was obligated to fund ATTRA.

Work for the ATTRA project takes place in six locations throughout the United States. The ATTRA project is staffed by more than 20 National Center for Appropriate Technology agricultural specialists with diverse backgrounds in livestock, horticulture, soils, organic farming, integrated pest management, farm energy, and other sustainable agriculture specialties. It provides information and other technical assistance to farmers, ranchers, extension agents, educators, and others involved in sustainable agriculture in the United States.

Small Socially-Disadvantaged Producer Grants Program:

The Small Socially-Disadvantaged Producer Grants (SSDPG) Program, formerly known as the Small Minority Producer Grant Program, provides grants to fund technical assistance to small socially disadvantaged producers from cooperatives and associations of cooperatives. In 2012, the SSDPG Program awarded \$3.0 million in grants to 19 organizations that assisted socially disadvantaged producers.

Kentucky's Center for Agriculture and Rural Development was selected for a \$107,825 award to provide technical assistance to small and socially disadvantaged producers who are interested or already engaged in alternative enterprises such as horticulture, aquaculture or pasture poultry.

The Spring Rose Growers Cooperative in Verona, WI, received a \$174,996 grant to assist a co-op of Hmong and Latin American producers continue to develop a collaborative community supported agriculture project and pursue organic certification.

RURAL BUSINESS - COOPERATIVE SERVICE

Summary of Budget and Performance Statement of Department Goals and Objectives

The mission of the rural development business and cooperative programs (RBCP) is "to enhance the quality of life for rural Americans by providing leadership in building competitive businesses including sustainable cooperatives that can prosper in the global marketplace."

RBCP has one strategic goal and two strategic objectives that contribute to one of the Secretary's Strategic Goal.

USDA Strategic Goal: Assist rural communities to create prosperity so they are self-sustaining, repopulating and economically thriving.

Agency Strategic Goal	Agency Objectives	Programs that Contribute	Key Outcome
Agency Goal 1: Increase economic opportunity in Rural America	Enhance capital formation and support the creation of diverse, sustainable businesses.	Intermediary Relending Program Rural Economic Development Loans Rural Economic Development Grants Guaranteed Renewable Energy Loans Renewable Energy Grants Guaranteed Business and Industry Loans Rural Business Enterprise Grants Rural Business and Cooperative Grants Biorefinery Assistance Program Bioenergy Program for Advanced Biofuels Rural Microenterprise Assistance Program	Enhanced capital formation and opportunities provided to agricultural producers and rural businesses
	Provide new opportunities for agricultural producers	Value Added Producer Grants	

Key Outcome: Enhanced capital formation and opportunities provided to agricultural producers and rural businesses.

Key Performance Measures and Targets:

RBCP will meet the strategic goal of assisting rural communities to create prosperity so they are self-sustaining, repopulating and economically thriving by investing financial resources and providing technical assistance to businesses and cooperatives located in rural communities and establishing strategic alliances and partnerships that

leverage public, private, and cooperative resources to create jobs and stimulate rural economic activity.

The 2014 Budget provides a funding level for BCP business development, energy, and technical assistance programs that will allow USDA to create and save an estimated 47,612 jobs.

The key goals discussed below will measure the agency’s performance and its support of one of the USDA’s strategic goals.

Number of Jobs Created and Saved							
	2008 Actual	2009 Actual	2010 Actual	2011 Actual	2012 Actual	2013 Target	2014 Target
Number	71,100	68,185	68,894	64,935	52,468	44,419	48,672
Program Level	\$1,526,000	\$1,093,000	\$1,437,000	\$1,490,025	\$1,151,738	\$867,392	\$880,140

Selected Past Accomplishments toward Achievement of Key Outcome:

The business & industry (B&I) guaranteed loan program accomplishments include:

- Created and maintained employment that improved economic climate in rural communities by providing loan guarantees to private lenders of up to 80 percent.
- In 2012, obligated 401 loans, totaling \$1.1 billion resulting in creating or saving an estimated 21,750 jobs.

Biorefinery assistance program accomplishments include:

- Provided loan guarantees to viable commercial-scale facilities.
- Awarded \$772 million since program inception.
- These projects produce 93 million gallons of advanced biofuel, generate 25,000 kWh of renewable energy, and redeem 3.2 million metric tons of CO₂ per year.

The intermediary relending program (IRP) accomplishments include:

- Provided direct loans at an interest rate of one percent to community-based intermediaries and assisted cities with population of less than 25,000.
- In 2012, the IRP program assisted 597 businesses and created 13,452 jobs in rural America.

The value added producer grant program accomplishments include:

- Provided grants for working capital or feasibility studies to rural producers to enhance their ability to increase revenues received for their processed products.
- Grant funds can be used for expansion, modernization or start-up, enhance the local job market mix and improve the local tax base. As a result, the overall local rural economy is stimulated, jobs are created, and quality of life improves.
- In 2012, a total of 299 grants were awarded totaling approximately \$40 million.

Selected Accomplishments Expected at the FY 2014 Proposed Resource Level:

RBCP will create over 48,000 jobs in 2014.

The business & industry guaranteed loan program accomplishments include:

- With a \$61.136 million budget authority in 2014, the B&I program will support a program level of approximately \$875 million (including carryover).
- This level of funding will support creating and saving an estimated 15,070 jobs and assisting/creating and or saving approximately 403 businesses in 2014.

The rural energy for America program (REAP) accomplishments include:

- In 2014, a budget authority of \$19.7 million will support a program level of approximately \$52.4 million.
- The anticipated benefits include 2,553 millions of kWh electricity generated with alternative energy sources, displacing 2.5 million metric tons of carbon emissions.

The intermediary relending program (IRP) accomplishments include:

- Based on an analysis of historical program data, it is anticipated that the \$18.9 million proposed program level in 2014 would impact over 642 businesses and create/save an estimated 14,280 jobs.

The rural business and cooperative grants accomplishments include:

- In 2014, the \$55 million in funding will support creating and saving an estimated 13,903 jobs and assisting/creating and or saving approximately 10,054 businesses and economic development entities in 2014.

The section 6022 rural microentrepreneur assistance program accomplishments include:

- In 2014, the budget will support a program level of \$22 million in loans creating or saving approximately 1,060 jobs.
